

Risk-Based Testing (RBT)

Risk Assessment Approach:

- **High Risk:**
 - **Login from New Device:** Security vulnerabilities, SMS not being received, user data breach.
 - **Premium Upgrade Process:** Incomplete document upload, incorrect validation of assets, failure in compliance review.
 - **Loan Approval Notifications:** Incorrect notifications, delay in SMS, incorrect rejection reasons.
 - **Commercial Registration Verification:** Incorrect data handling, failure in third-party integration, incorrect validation of start date.
- **Medium Risk:**
 - **Loan Approval Process:** Miscommunication between departments, failure in approval timestamp recording.
 - **Investors' Premium Account Upgrade:** Errors in document verification, failure to notify relation manager.
- **Low Risk:**
 - **Notification Delivery:** SMS delivery failure due to network issues.
 - **Third-party Integration:** Temporary failure in third-party services.

Test Focus:

- Focus on the **login flow** (new device) and **premium account upgrade** as they are high-risk functionalities.
- **Stress test** the **loan approval system** to handle cases where multiple departments approve/reject at once.
- Ensure **validation** of **third-party integration** for corporate investors to avoid incorrect registration verifications.

Test Runs

1. **Test Run for User Login (New Device)**
 - Focus: Login process, OTP validation, SMS notification.
 - Priority: High
 - Expected Result: User logs in successfully, all other devices logged out, SMS received.

2. **Test Run for Premium Account Upgrade**
 - Focus: Document upload, compliance team review, notifications.
 - Priority: High
 - Expected Result: Documents uploaded successfully, user notified upon successful upload.
3. **Test Run for Loan Approval Notifications**
 - Focus: Approval and rejection SMS notifications.
 - Priority: High
 - Expected Result: Correct SMS notifications sent upon loan approval or rejection.
4. **Test Run for Department Approvals**
 - Focus: Approving loan requests, viewing department approvals.
 - Priority: Medium
 - Expected Result: Loan request approved, displayed with timestamp.
5. **Test Run for Commercial Registration Verification**
 - Focus: Verification with third-party, handling invalid inputs.
 - Priority: High
 - Expected Result: Validations correctly handle valid/invalid data and proceed accordingly.

Test Cases Summary

User Story	Test Case Description	Priority
Registered User Login From a New Device	Login successfully from new device, logout from others	High
	Fail login with incorrect OTP	High
Individual Investor - Upgrade To Premium	Upload document and notify user upon success	High
	Fail document upload with invalid file format	Medium

Approvals Notifications	SMS	Send approval SMS notification to loan requester	
	Send rejection SMS with reason		High
Departments Approval	Approve loan requests and view approval history		Medium
	Verify department approval status display		Medium
Corporate Investor - Commercial Registration	Verify commercial registration via third-party		High
	Handle invalid commercial registration		High
